Who's Next
Eliminators
Reviewed 6/5/23

Actions to stop doing:
- Team members should stop showing up to meetings late to maximize productivity and minimize wasted times when group members aren't together
- Members should stop getting distracted or off track from the focus of meetings to reduce wasted time.

Actions to start doing:
- Team should refuse to merge code that does not follow the style guide and members should correct improperly formatted code before merging with main.
- Plan out how we can accomplish the remaining product backlog after grads.
- Better document code and have more dedicated meetings where each member explains the code they wrote so everyone has an understanding of it if they need to use their code.

Actions to keep doing:
- Team should continue to practice scrum methodology so that they have a well rounded understanding of it when going into the field.
- Team should do pair programming more frequently to improve group understanding and increase productivity.

Work Completed	Not completed
I am a user, I want to be able to view my target, so that I know who to eliminate	
I am a user, I want to eliminate a player, so that I can gain elimination points	
I am a user, and I want to be able to win a match, so that I can win the game.	
I am a user, I want to access the leaderboard, so that I can see who's in the match.	
I am a user, I want to save a picture of myself, so that the person who's eliminating me knows what I look like.	

Total number of user stories completed: 5
Total number of estimated ideal work hours: 60
Total number of days during the prior sprint: 14
User stories/day: .36
Ideal work hours/day figures: 4.25
