Who's Next
Eliminators
4/24/23

Actions to stop doing:
- The team should stop merging code without performing pull requests, because conflicts and mistakes that are overlooked by an individual can more easily be caught by an additional set of eyes, saving us time spent correcting mistakes and conflicts.
- The team should stop copy and pasting code sections that could more easily be modularized, because this causes inconsistencies across the code base.

Actions to start doing:
- The team should start better modularizing and abstracting similar code, so as to reduce redundancies and simplify logic.

Actions to keep doing:
- Team should keep arriving at meetings on time and communicate as frequently as possible to reduce confusion and maximize productivity.
- Team should keep working on separate branches for any unique functionality to ensure changes are saved separately to reduce conflicts and categorize changes
- Team should keep opening pull requests whenever they want to merge new functionality to reduce mistakes

Work Completed	Not completed
"I am a user of Who's Next, I want to log into the app, so I can track my progress."	
"I am a user, I want to start to see the leaderboard, profile page, and the image of targets."	

Total number of user stories completed: 2
Total number of estimated ideal work hours: 40
Total number of days during the prior sprint: 14
User stories/day: 0.14 per day
Ideal work hours/day figures: 3 hours per day
